Indication of immediate medical attention and special treatment needed

If symptomatic, move to fresh air. Get medical attention if symptoms persist.

Wash with soap and water. Get medical attention if symptoms occur.

Any material that contacts the eye should be washed out immediately with water. If easy to do, remove contact lenses. Get medical attention if symptoms persist.

Seek medical advice.

Direct contact with eyes may cause temporary irritation.

Treat symptomatically.

Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace.

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Methods and materials for containment and cleaning up

Environmental precautions

Wear protective clothing as described in Section 8 of this safety data sheet.

Sweep or scoop up and remove. For waste disposal, see Section 13 of the SDS

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Conditions for safe storage, including any incompatibilities

Wear appropriate personal protective equipment (See Section 8). Wash thoroughly after handling. Observe good industrial hygiene practices.

Dust or powder: Use only with adequate ventilation. Avoid breathing dust.

Store at ambient temperature and atmospheric pressure. Store away from incompatible materials (See Section 10)

8. Exposure controls/personal protection

Occupational exposure limits

US. OSHA Table z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form
Dust (CAS-)	PEL	5 mg/m ³ 15 mg/m ³	Respirable fraction. Total dust.

US. OSHA Table Z-3 (29 CFR 1910.1000)

Components	Type	Value	Form
Dust (CAS-)	TWA	5 mg/m ³ 15 mg/m ³ 50 millions of particles 15 millions of particles	Respirable fraction. Total dust. Total dust. Respirable fraction.

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
Dust (CAS-)	TWA	3 mg/m ³ 10 mg/m ³	Respirable particles. Total dust.

Biological limit values

No biological exposure limits noted for the ingredient(s)

Appropriate engineering controls

Ensure adequate ventilation, especially in confined areas.

Individual protection measures, such as personal protective equipment

Eye/face protection

Normal eye protection practices should be used. If dusty conditions exist, chemical goggles are recommended.

Skin protection

Hand protection

Regular work gloves.

Other

Wear apron or protective clothing in case of contact. If contact with forearms is likely wear gauntlet style gloves.

Respiratory protection

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA 29 CFR 1910.134. Respirator type: Air-purifying respirator with an appropriate, government approved (where applicable), air-purifying filter, cartridge or canister. Contact health and safety professional or manufacturer for specific information.

Thermal hazard

Wear appropriate thermal protective clothing, when necessary.

General hygiene

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, or/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
