   Glass is an amorphous fusion of materials whose constituents are tightly bound together and are in a specific chemical environment, totally different from the initial state (in raw materials) and from that occurring in simple compounds (metals or oxides). Under normal conditions, glass never gives metal or oxide as direct dissociation products. Under extreme conditions, only a tiny fraction of glass constituents could leach from the glass matrix into aqueous solutions.

4. FIRST-AID MEASURES

**Inhalation**
If symptomatic, move to fresh air. Get medical attention if symptoms persist.

**Skin Contact**
Wash with soap and water. Get medical attention if symptoms occur.

**Eye Contact**
Material that contacts the eye should be washed out immediately with water. If easy to do, remove contact lenses. Get medical attention if symptoms persist.

**Ingestion**
Seek medical advice.

**Most Important Symptoms/Effects, Acute and Delayed**
Direct contact with eyes may cause temporary irritation.

**Indication of Immediate Medical Attention and Special Treatment Needed**
Treat symptomatically.

5. FIRE-FIGHTING MEASURES

**Suitable Extinguishing Media**
Water, Water fog, Foam, Dry chemical, and Carbon dioxide (CO₂)

**Unsuitable Extinguishing Media**
None known

**Specific Hazards Arising from the Chemical**
None known

**Special Protective Equipment and Precautions for Firefighters**
Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace.

**Fire-fighting Equipment/Instructions**
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

6. ACCIDENTAL RELEASE MEASURES

**Personal Precautions, Protective Equipment and Emergency Procedures**
Wear protective clothing as described in Section 8 of this SDS

Sweep or scoop up and remove.
For waste disposal, see Section 13 of the SDS

**Environmental Precautions**
Avoid discharge into drains, water courses or onto the ground.

7. HANDLING AND STORAGE

**Precautions for Safe Handling**
Wear appropriate personal protective equipment (See Section 8).
Wash thoroughly after handling.
Observe good industrial hygiene practices.
Dust or powder: Use only with adequate ventilation.
Avoid breathing dust.

**Biological Limit Values**
No biological exposure limits noted for the ingredient(s).

**Appropriate Engineering Controls**
Ensure adequate ventilation, especially in confined areas.

**Individual Protection Measures, such as Personal Protective Equipment**
**Eye/Face Protection**
Normal eye protection practices should be used. If dusty conditions exist, chemical goggles are recommended.

**Skin Protection**
- **Hand Protection**
  Regular work gloves.
- **Other**
  Wear apron or protective clothing in case of contact. If contact with forearms is likely wear gauntlet style gloves.

**Respiratory Protection**
- If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.
- In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA 29 CFR 1910.134.
- Respirator type: Air-purifying respirator with an appropriate, government approved (where applicable), air-purifying filter, cartridge or canister. Contact health and safety professional or manufacturer for specific information.

**Thermal Hazard**
Wear appropriate thermal protective clothing, when necessary.

**General Hygiene**
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
